

Dear Parent/Carer

Congestion on the roads around our school in the morning and afternoon poses a risk to all our children and their families as they travel to school. This can be reduced by more children walking to school. However, we recognise that there are circumstances when travelling to school is the only option.

We are currently updating the School's Travel Plan and need your help. Please complete the following and return to school by . .

How do you travel to school?

Why do you use the above?

Where do you usually park?

What are the main issues for you around parking?

Would you be interested in using a "Park and Stride" system?

Have you any suggestions to help relieve the congestion and improve safety?
